# Plant Based Meat

Ingredients from Europe and a Magic touch from the Middle East

Plant based products have become the fastest growing sector of the food industry in the 21st century. Diets free of animal products have been medically proven to reduce the risk of heart disease and cholesterol related illness. Plant-based diets reduce our carbon footprint by 70% and save the lives of 105 animals per person annually. Let's partner on a journey towards the future of food.

- Cholesterol Free
- Antibiotic and Hormone Free
- GMO Free
- Rich in Plant Based Protein and Fiber
- Environmentally Sustainable
- Ethical
